

# This house believes that social media has improved communication

Motion for the debate  
happening on the 1st of July  
at 10 AM in As202

# Introduction

- The 21st century is the century of transformation such as energy transformation, digital transformation, environmental transformation and social transformation... But the biggest remains the technological revolution, which has changed a lot of the way we communicate.
- According to Oberlo, as of 2019, there are 3.2 billion social media users around the world, accounting for about 42% of the Earth's population. In addition, there are about 4.5 billion Internet users worldwide today. These statistics are proof of the growing dominance of digital media in our daily lives.
- So today we will focus on whether communicating through social media has improved communication. If it has, what downsides does it have ?

# Some resources

How has social media emerged as a powerful communication medium?

How social media is changing the way people get to know one another?

Does social media improve or impede communication?

How Has Social Media Affected Communication

Negative Effects of Social Media on Communication Skills
